

## **About Amador Bioscience**

Amador Bioscience is a global translational and clinical CRO, providing global-standard (GLP/GCP) laboratory, clinical research, strategy consulting, and regulatory filing services to leading pharmaceutical companies in Europe, China, and the U.S. The laboratory services focus on bioanalysis, biomarkers, and immunogenicity assessment. The clinical research unit specializes in innovative clinical development strategies, protocol design, study initiation, and monitoring of clinical studies in Europe, China, and the US. In addition to the R&D strategy and regulatory pathway, the consulting services perform global-standard data analysis and generate submission-ready study reports.
